

SUCCESSFULLY TESTED BLAST-RESISTANT BUILDINGS EQUIPPED WITH THREAT MITIGATION.

COVERSIX SHELTERS

HARDENED SHELTERS THAT GO WHERE YOU GO.

At RedGuard, we created CoverSix Shelters with one mission—to protect those who protect us. To do so, we took the industry's premier successfully tested blast-resistant buildings, equipped them with customer-specific ballistic mitigation and made them portable enough to be taken to the world's most remote locations.

Available in standard ISO container sizes of 8' x 10,' 8' x 20' and 8' x 40,' CoverSix Shelters are commonly used for: Base Camps • Command Centers • Guard Shacks • Showers and Restrooms • Sleeping Quarters • Sensitive Equipment • Mobile Data Centers • Generator Rooms • Storage

BARRACKS & BUNKERS

Hardened shelters save lives from the training range to the front lines.

FORCE PROTECTION

Built from the ground up for mission-specific application and protection.

GUARD SHACKS

Control entry and access while providing blast and ballistic protection to personnel.

Transportable: Manufactured in standard ISO container sizes to facilitate transportation during contingency operations through the use of commercial truck lines, cargo ships and rail.

Deployable: Can be implemented as shelters in theater with the use of Heavy Expanded Mobility Tactical Truck (M1120A4) and Rough Terrain Container Handler (RTCH).

Scalable: Single- and multi-section designs allow shelters to be sized up or down to meet mission-specific needs.

Customizable: Shelters are designed and manufactured to meet each users specific requirements which can vary from unit to unit, or agency to agency.

Reliable: Shelters contain few mechanical parts making them extremely durable in even the harshest of environments.

TESTING AND CERTIFICATIONS

- Successfully blast tested with 1250 pounds ANFO from 110 feet
- Ballistic resistant to meet NIJ level III
- Fatigue analysis performed for repeat blast loads
- Building Protection Levels of Medium to High per DoD UFC 4-010-01
