

This building was created to house the client's employees and its on-site contractors, while maintaining a clear separation between them. The structure is a multi-purpose facility and includes built-in work spaces, ADA-compliant restrooms, conference space, an external vestibule, and kitchens/break rooms. One unique feature of the building is its brick exterior. As a blast-resistant building, it was designed to withstand the designated blast loads, and also factored in brick ties to secure the brick to the exterior walls. It is a creative way to take advantage of the safety of a modular BRB while providing a site-built look. We also provided modular turnstiles for this project to assist with their access control needs.

BUILDING SPECS AND FEATURES

Building Size:

48' X 40' X 11'

Protection Level:

8 PSI / 200 MS

Why RedGuard?

RedGuard is the leading authority in blast resistance and a world leader in providing safe, customizable and scalable modular buildings. RedGuard has aligned with industry-leading strategic partners who are known across the globe, and with a third party engineering firm recognized as the foremost authorities on blast engineering. To save time and money, and to mitigate hazard areas as soon as they are identified, RedGuard can provide you with immediate turnkey solutions, or we can custom engineer a solution based on site requirements.
