

# CP #1463 GUARD HOUSE

## BUILDING SPECS AND FEATURES

### Building Size:

8' X 10' X 11' / Stand alone unit

### Protection Level:

1.3psi / 200ms Blast resistance

### Building Details:

This Guard House is a low psi version of our typical guard station, used to control access and entry to a facility, and to protect the personnel inside. It includes a custom HVAC, special window placement and thermal requirements that were very specific to the customer.

RedGuard is the leading authority in the area of modular safe space, and we are proud to have some of the world's largest corporations as our customers. While we can't always share their names, we share some of the custom projects that they have entrusted to us. We are dedicated to the concept, design, build, install and operation of blast-resistant buildings. We have earned the respect of engineers, architects, contractors, planners and other oil and gas industry specialists throughout the world.
