

# CP #1482 SECURITY BUILDING

## BUILDING SPECS AND FEATURES

### Building Size:

27' X 41' X 11'

### Protection Level:

VersaBilt

### Building Details:

Needs in this project demanded a multi-use structure that would hold up to years of use in an industrial setting. The customer, with past experience using "soft-sided structures," was impressed with VersaBilt modular buildings which, though "non-blast," are rugged, heavy gauge steel. As a security/guard office, the structure is outside of the blast zone, and required only non-classified electrical equipment. Customizations included the addition of a sliding window into a reception area, men's & women's restrooms, a kitchen, a conference room, multiple offices and an electrical room.

RedGuard is the leading authority in the area of modular safe space, and we are proud to have some of the world's largest corporations as our customers. While we can't always share their names, we share some of the custom projects that they have entrusted to us. We are dedicated to the concept, design, build, install and operation of blast-resistant buildings. We have earned the respect of engineers, architects, contractors, planners and other oil and gas industry specialists throughout the world.
