

CP #1602 HURRICANE SHELTER

BUILDING SPECS AND FEATURES

Building Size:

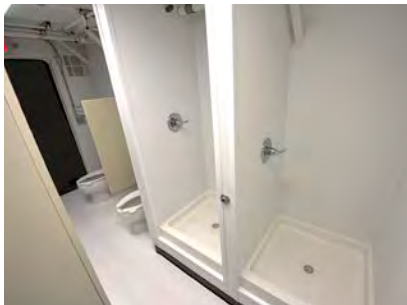

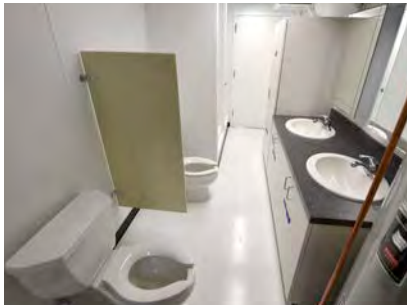

8' x 40' x 8-6"

Protection Level:

Hurricane and Tornado protection

Building Details:

The end user for this application needed to have a constant presence at their power facility, even during events like hurricanes. The building can provide living quarters for up to 12 people during a hurricane. In addition to restrooms, showers, kitchen and sleeping quarters, the building also maintains connectivity to two separate auxiliary power sources in order to keep the unit up and operational.

RedGuard is the leading authority in the area of modular safe space, and we are proud to have some of the world's largest corporations as our customers. While we can't always share their names, we share some of the custom projects that they have entrusted to us. We are dedicated to the concept, design, build, install and operation of blast-resistant and other protective buildings. We have earned the respect of engineers, architects, contractors, planners and other oil and gas industry specialists throughout the world.
