

**SAFETYSUITE**

TESTED FOR LIFE

At RedGuard, we combine all the engineering behind the industry's best successfully tested blast-resistant buildings with the virtually unlimited amenities of a traditional brick and mortar office building. We put the power in your hands with options like wall coverings, custom cabinetry, restrooms, and even the building's overall size. The only things off limits are our unparalleled standards for strength and safety.

**SafetySuite:** The needs for safe structures can be complex. With this in mind, RedGuard's line of fully customized blast-resistant structures gives you virtually unlimited manufacturing capabilities. SafetySuite is backed by a successfully tested, blast-resistant design, giving you both peace of mind and function. These durable, comfortable and reliable structures are unrivaled by the competition.

**The Process:** When your project starts we'll work directly with you to develop an overall concept. During this phase, we'll study your site plan and look at any existing buildings that need to be considered. Next, we'll review your day-to-day operations to determine a solution that will fit your unique needs. We'll quickly transform the concept into a full architectural design before sitting back down with you to choose your building's finishes.

When it comes time for construction, SafetySuite buildings are produced in a short timeframe and at a fraction of the cost of traditional brick and mortar buildings. And since SafetySuite buildings are built off-site, your entire operation can remain up and running during construction, meaning no lapses in efficiency or productivity.

A SafetySuite provides the space you want and the protection you need. Some custom designs have included strategic control rooms, executive offices, laboratories and conference rooms, but the possibilities are endless.

#### Kitchen and Dining

Grab a bite to eat and relax in complete security.

#### Conference Room

Meet while enjoying state-of-the-art comfort and protection.

#### Control Room

Work in an environment built for efficiency and safety.

**Ready to get started?** Just bring us your wildest idea and we'll turn it into reality.

At RedGuard, we focus on five key disciplines: concept, design, build, installation and operation. We have already earned the respect of oil and gas industry professionals throughout the world. As the leading authority in the area of modular safe space, we are proud to serve the world's largest corporations and look forward to earning your business and your trust.
