

MULTI-SECTION

SUCCESSFULLY TESTED BLAST-RESISTANT BUILDINGS FROM REDGUARD.

LEASEFLEET

GET ALL OF THE SPACE YOU NEED.

NEED TO GO BIG? Our multi-section blast-resistant, CSA-certified buildings are the answer. Constructed by combining any of our standard 12-foot-wide buildings, these multi-section structures can grow to 24 feet wide to meet your unique needs. All buildings are constructed from the ground up utilizing CWB-certified welders to achieve the highest Canadian weld standards. Insulated for extreme Canadian weather and engineered to RedGuard's industry-leading safety specifications, each 12 x 40-foot blast-resistant building adheres to API 753 and has been successfully blast tested. In addition, all of our buildings meet the criteria for a low or medium response (low or medium damage) rating by the American Society of Civil Engineers.

EACH BUILDING THAT MAKES UP THE MULTI-SECTION STRUCTURE COMES FULLY EQUIPPED WITH: Redundant placement of steel floor, wall and ceiling members covered with 10-gauge steel panels • 7/16" oriented stranded board (OSB) or fiber reinforced plastic panels (FRP) • Four steel-reinforced doors • ISO lift and tie down points at each corner • Fiber-reinforced plastic wall and ceiling panels • Interlocking polyvinyl coin tile floors • Tamperproof and shielded fluorescent overhead lighting • Two, three-inch ports for incoming electrical and communication services • Standard RJ-45 or RJ-11 phone and Ethernet jacks • Fiberglass insulation • A wall-mounted HVAC unit • Smoke/carbon monoxide detectors • ABC fire extinguishers • Exit signs with emergency lighting • Exterior coating of red polyurea

THREE-PLEX

Ample space for dozens of contractors or operators to remain safe near the work site.

AMENITIES

The larger footprint of multi-section installation allows room for amenities like lockers, kitchens and office space.

PLAN AHEAD. While we're proud to feature the world's largest fleet of blast-resistant buildings and multiple, strategically placed, distribution centers across North America, it is still important to get us involved in your planning process as soon as possible. By doing so, we can not only ensure you get the buildings you need but we can get them to you in the most economically efficient way possible.
