

FULLY CUSTOMIZABLE, SUCCESSFULLY TESTED BLAST-RESISTANT BUILDINGS.

**SAFETY SUITE**

## IF YOU CAN DREAM IT, WE CAN BUILD IT.

Only at RedGuard can you combine all the engineering behind the industry's best successfully tested blast-resistant buildings with the virtually unlimited amenities of a traditional brick and mortar office building.

From flooring and wall coverings to custom cabinetry and restrooms (even your building's overall size), we put the power in your hands. The only things off limits are our unparalleled standards for strength and safety.

SafetySuites can be used for everything from strategic control centers and executive offices to planning rooms and medical field stations—providing both the space you want and the protection you need. And for those harsh Canadian winters, we even incorporate high-performance HVAC systems and insulation to ensure maximum comfort and year-round productivity.

**THE PROCESS.** We'll start your project by working directly with you to develop an overall concept. During this phase, we'll study your site plan, look at any existing buildings that need to be considered and review your day-to-day operation to determine a solution that will fit your unique needs.

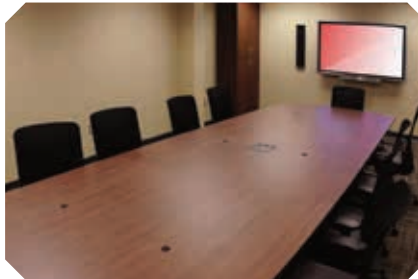

From there, our team will quickly transform the concept into a full architectural design before sitting back down with you to choose your building's finishes.

When it comes time for construction, SafetySuites are produced in a short timeframe and at a fraction of the cost of traditional brick and mortar buildings. And since SafetySuites are built off site, your entire operation can remain up and running during construction, meaning no lapses in efficiency or productivity.

### KITCHEN AND DINING

Grab a bite to eat and relax in complete security.

### CONFERENCE ROOM

Meet while enjoying state-of-the-art comfort and protection.

### CORPORATE OFFICE

Work in an environment built for efficiency and safety.

**READY TO GET STARTED?** Just bring us your wildest idea and we'll turn it into reality.
