

RENEWABLE ENERGY SOLUTIONS

TESTED FOR LIFE

PERMANENT BLAST-RESISTANT STRUCTURES

For your permanent building needs, consider a completely customized blast-resistant building. Built off-site to save time and money, these multi-section buildings can have all the amenities that you'd find in a traditionally built structure. They are designed to be up-and-running in a minimal amount of time.

BLAST-RESISTANT TEMPORARY OFF LEASING

When extended maintenance requires more manpower, consider bringing in blast-resistant buildings that can be leased temporarily and then removed when no longer necessary. Available in many configurations, steel blast resistant buildings are the fastest, easiest way to protect your team.

TECHNICAL BUILDING

Modular electrical enclosures are available to serve the biodiesel operation. Applications include control room, control skid, switchgear, MCC, or other electrical buildings.

FACILITY SECURITY ACCESS

Due to site hazards, many bio-diesel plants desire controlled access. Modular security buildings and turnstiles are an easy way to accomplish that.

CONSTRUCTION SITE MODULAR STORAGE

Temporary onsite storage containers allow you to remove what you don't need after construction, leaving only essential storage. Available in 20' or 40' to keep tools and materials secure. Storage is available in blast-resistant and non-blast units.

BIO-DIESEL

TECHNICAL BUILDINGS

Modular electrical enclosures are available to serve the RNG operation. Applications include control room, switchgear, MCC, substation and other electrical buildings.

PROCESS SKIDS

Modular process skids pre-piped with all necessary components for operation. Applications include digester gas skids, CO₂ removal, gas filtration and moisture removal skids and much more.

PORTABLE STORAGE CONTAINERS

During the worksite's construction, there may be a greater need for equipment and materials storage than during worksite operation. Temporary onsite storage containers are the solution. Available in 20' or 40', you can add and remove containers as needed to keep tools and materials secure.

MODULAR CONTROL ROOM STRUCTURES

A spacious, modular SafetySuite (blast resistant) or VersaBilt (non-blast) control room can save time and money, versus typical conventionally constructed buildings. Both are fully customizable with a wide variety of options and configurations available to meet your needs. Available in various electrical classifications and pressurized if required.

PORTABLE OFFICES OR SECURITY ACCESS BUILDINGS

During construction of a renewable natural gas facility or as a way to control/monitor access, an onsite office or guard shack may be necessary. Climate-controlled and comfortable, these modular buildings can easily be placed for temporary or permanent use. Office/storage combo units are also an option and all purchased units can be customized.

RENEWABLE NATURAL GAS

CONSTRUCTION SITE MODULAR STORAGE

During construction of a solar array, there may be more equipment and materials to store than during operation. Temporary onsite storage containers allow you to remove what you don't need after construction, leaving only essential storage. Available in 20' or 40' to keep tools and materials

ENERGY STORAGE ENCLOSURES

Modular electrical enclosures are available to serve as energy storage for a solar array. Units can include battery enclosures, control buildings, E-houses or instrumentation enclosures.

PORTABLE OFFICE SOLUTIONS

Ready-to-use modular portable offices are a great addition during construction, or when a small onsite office is desirable. 20' and 40' options, with and without storage are available.

FACILITY SECURITY ACCESS

If site security or controlling access is a top priority, consider a modular office, security office, or even turnstile module. Most modules can even be customized to site specifications.

SOLAR POWER

SERVICE VESSEL ACCOMMODATION MODULES

Our offshore certified accommodation, galley, diner office, laundry and flex (open) modules can be utilized on vessels in service of wind power farms. All modules are ABS/DNV/USCG certified.

SUBSTATION MODULES

Modular or Single Lift substation modules delivered complete and ready to be put into service. Modules provide a step down in high voltage electricity for transmission to the power grid.

PORTABLE OFFICE AND SECURITY ACCESS

During construction of a wind farm or as a way to control/monitor access, an onsite office may be necessary. Climate-controlled and comfortable, these modular offices can easily be placed for temporary or permanent use. Office/storage combo units are also an option and all purchased units can be customized.

CONSTRUCTION SITE MODULAR STORAGE

During site construction, there may be more equipment and materials to store than during wind farm operation. Temporary onsite storage containers are a great solution. Available in 20' or 40', you can add and remove storage as needed and keep tools and materials secure.

WIND POWER

Creating energy is a necessary and sometimes dangerous process. RedGuard has served refineries and petrochemical plants in North America and internationally for years with structures that protect lives in hazardous areas. Like many in the industry, we see a rise in renewable energy. That's good news for our planet, and we're looking for ways to introduce our safe structures to those generating energy by solar, wind, hydropower, and biological sources.

LEASEFLEET

LeaseFleet: With the largest lease-ready BRB fleet of its kind in North America, you'll find quick, proven protection that's guaranteed to meet the needs of virtually any project—no matter how big. LeaseFleet has nearly 1,200 buildings and growing, providing you safety in numbers with a level of customer service that can't be found anywhere else.

SAFETYSUITE

SafetySuite: When your needs for safe structures are more complex, RedGuard has a premier line of fully customized blast-resistant structures. These provide both the peace of mind and uncompromised comfort necessary to get the job done. Backed by the industry's only successfully tested, blast-resistant design and virtually unlimited manufacturing capabilities, a SafetySuite BRB is a durable, comfortable and reliable environment, unrivaled by the competition

REDISUITE

RediSuite: To avoid custom project delays and save weeks in design and production time, we offer the industry's first standardized, suite-quality blast-resistant buildings. With top tier quality and safety, these pre-engineered modular buildings come in popular multi-functional layouts. Like all of our blast-resistant buildings, RediSuite increases efficiency and saves lives on-site

VERSABILT™

VersaBilt: Innovative modular structures designed to meet the changing needs of fast-growing organizations. Built upon an all steel frame, these structures are not only dramatically stronger and longer lasting than traditional wood frame buildings, they can be easily modified to grow with your organization. All VersaBilt structures are built in RedGuard's production facility to virtually eliminate disruptions and liabilities on your site.

COVERSIX

CoverSix Shelters: The ultimate solution to keep personnel, equipment and electronics safe and secure. CoverSix provides government and military customers with a wide variety of structures for protection and security at any threat level. These structures feature threat mitigation such as blast resistance, ballistic resistance and/or storm protection, as well as custom-outfitted ISO containers to be used as portable storage facilities and mobile office locations.

SITEBOX STORAGE

SiteBox Storage: As the go-to storage solution for companies throughout Kansas, Missouri, Oklahoma and Texas, SiteBox Storage offers you the most responsive and reliable customer service to help you become more productive, organized and better protected. And we do it in the shortest timeframe imaginable. Sitebox Storage has unmatched logistics and have one of the region's largest fleets of portable storage units and on-site offices.

ARMODA

Armoda: Armoda provides a range of modular solutions, including completely custom-fabricated technical buildings and workforce accommodation modules for both offshore and onshore installations. The company has a fleet of leasable assets and an onsite service team for maintenance, service, and parts. In addition to the oil and gas industry, the company also supports renewable energy, maritime, military/defense, construction, and emergency response industries.

Why RedGuard?

RedGuard builds modular solutions that protect lives and assets. It is the leading supplier of blast-resistant buildings and modular safe spaces. RedGuard's other innovative divisions and product lines specialize in modular safe structures, most with threat mitigation. The company is dedicated to five key disciplines: concept, design, build, installation and operation. Its success across these areas of expertise has led some of the world's largest organizations to trust their employees' lives to RedGuard products.
