BUILT TO EXCEED EXPECTATIONS

Asset Refurbishment & Life Extension

Armoda specializes in the refurbishment and modernization of existing assets, helping operators extend equipment service life while maintaining compliance with evolving operational requirements. Services can be performed at customer facilities, offshore locations or within Armoda's service network.

Engineering & Technical Assessments

Our team provides surveys, FEED studies, and facility siting studies to support project planning, regulatory compliance and operational decision-making. From concept development to implementation, we deliver practical solutions tailored to project-specific requirements.

Maintenance & Reliability Programs

Preventative maintenance plans, inspections, and recertification services help minimize downtime, improve reliability and maximize operational efficiency throughout the asset lifecycle.

Emergency Response & Field Support

When unexpected issues arise, Armoda's service technicians provide rapid response capabilities, emergency repairs, troubleshooting and field support to restore operations as quickly as possible.
